## ABOUT FF DIN LIGHT ITALIC

In 1994, in San Francisco, Albert-Jan Pool and Erik Spiekermann took a cab together from the ATypI conference to the airport. Spiekermann knew that Pool's employer went bust, so he told him that if he wanted to earn some money with type design, he should have a look at fonts such as OCR and DIN. At the same time, he invited Pool to Berlin to discuss the idea in detail. One year later, FontFont published Pool's typeface FF OCR-F, followed by the family FF DIN. Spiekermann had the skill to point out an empty space in the market. Digital DIN fonts were available at that time, however, only in two weights and solely in pure geometric shape. Pool designed a family of five weights, he added true italics and also some alternative characters, such as the "i" with a round dot and the lower case figures. With time, DIN Condensed was added, as well as Greek and Cyrillic versions. The shape of the new FF DIN differs from the original mostly by thinner horizontal strokes and by more fluent curves. Despite its primitive, technical look and the clear reference to the German motorway signboards, FF DIN became a phenomenon. The typeface has even pervaded book and magazine typography, and it found its place in posters of cultural institutions.

## ABOUT ALBERT-JAN POOL

Albert-Jan Pool was born in 1960 in Amsterdam. He studied at the Royal Academy of Arts in The Hague. Initiated by professor Gerrit Noordzij the Academy had become an incubator of type design. Albert-Jan was one of the co-founders of Letters], a group of young Dutch type designers. Many of its members (Frank Blokland, Erik and Petr van Blokland, Jelle Bosma, Luc(as) de Groot, Bart de Haas, Henk van Leyden, Peter-Matthias Noordzij, Marie-Cécile Noordzij-Pulles, Just van Rossum and Peter Verheul) have become well-known type designers. After his study he left for Germany. From 1987 to 1991 he was Type Director at Scangraphic in Wedel, near Hamburg. From 1991 to 1994 he was Manager of Type Design and Production at URW in Hamburg. During this time he completed his type families URW Imperial, URW Linear and URW Mauritius. By January 1995 he started his own studio Dutch Design in Hamburg. FF DIN and FF OCR-F were among his first projects. He had been teaching type design at the

Muthesius Hochschule in Kiel from 1995 to 1998, as well as typography at the Hamburg Academy for Marketing and Media. Together with type consultant Stefan Rögener of AdFinder GmbH and copywriter Ursula Packhäuser he wrote and designed a both useful and provocative book on the effects of type on brand image entitled “Branding with Type”, which has been published by Adobe Press. Dutch Design finally merged into FarbTon Konzept + Design. The new company was co-founded 1999 with Jörn Iken, and Klaus-Peter-Staudinger, as well as with Birgit Hartmann who is also the mother of their daughter Pia-Elina (born 1999). For customers of FarbTon he created several corporate typefaces such as Jet Set Sans together with Syndicate Brand & Corporate for Jet/Conoco in 1997, C&A InfoType together with Factor Design for C&A in 1998, DTL HEIN GAS for HEIN GAS Hamburger Gaswerke in 1999 and Regenbogen Bold for Regenbogen, a political party in Germany in 2001. Pool is currently working on several new series in order to extend the family of FF DIN.
